Skills

JavaScript, HTML, CSS, React, Next Js, Tailwind CSS, Vite, Vercel. Firebase, Github, Git, Render Cloud, Figma, MongoDB, VS Code

Experience

Front-End Developer • New Vision Institute • April - 2021

- Created a responsive and functional website for students to sign up for the institute
- Increased conversion rate since they were able to expand rather than being local

Freelance Web Developer • Digital BNB • May - 2023

- Built a booking website same as Airbnb
- Ensured smooth and responsive design
- Users can now book accommodations, rent cars, and enjoy experiences

Projects

Book Me

- Developed an application where people can rent & book accommodations while traveling with user authentication using Firebase authentication
- Used Vite/React for the Frontend, Firebase for the Backend, and made my code more manageable and organized by using React reducers
- Only authenticated users can list their accommodations in the website

Volar

- An e-commerce website to buy luxury watches from famous brands with a catalog page with different categories built in Next js
- Users can add products to their cart and purchase them using Stripe payment gateway, with MongoDB as the database, Express & Node js for the Backend
- Cool animation and smooth user experience using Tailwind CSS and Aos

The Blog

- A blog website where you and other authors can write blogs and edit them, each blog can only be edited by its author
- Used Amazon S3 to store data as objects within buckets
- Used JWT and Cookies to authenticate users

Food Mood

- Web app that helps you find recipes from all over the world with filter by category option
- Used theMealDB API to fetch recipes data and make it available in the application

Education

Thanawiya Wadi Alneel

SSC (Secondary School Certificate) in Medical Engineering.

Interests

Football, Stocks, SAAS, Swimming, Traveling, Fitness
