Projects & Experience

Book Me

I built an application where you can book accommodations while traveling, and you can also list your accommodations so people can book it too.

React | Vite | Firebase | Uuid | Reducers

The Blog

A blog application where you and other authors can write blogs and edit them, each blog can only be edited by its author.

Mongo DB | Node Js | Express Js | JWT & Cookies | AWS | Render Cloud

Volar

An e-commerce website to buy luxury watches from famous brands with a stripe payment gateway and pages for product page, cart, and categories all linked together.

Next Js | Swiper Js | Mongo DB | Tailwind CSS | Stripe | Aos

Food Mood

An application that helps you find recipes from all over the world. I have used theMealDB API to fetch data.

API | Vercel | React | React Router
